

# Oregon's First Community Supported Fishery (CSF) is Expanding!

## Port Orford Sustainable Seafood (POSS)

POSS is a collaborative effort to bring sustainable seafood from our small day boats to your table.

Modeled after Community Supported Agriculture, a CSF is a coastal community of people collaborating with local fishermen to buy fish directly for a predetermined length of time.

Community Supported Fisheries allow us to have a conversation with seafood consumers about the entire food-supply-chain process of what swims in the ocean to what lands on our plates. By creating transparency around our seafood production processes, CSFs help define the importance of local food sources by emphasizing sustainable fishery practices, encouraging environmental sensitivity among fishermen, ensuring higher quality processing standards, providing a direct-to-consumer relationship, low-carbon foot-print, and ultimately a competitively priced higher quality seafood experience for the consumer.

POSS offers monthly full shares and monthly half shares. Each season lasts four months. Full shares are \$100 and in return you receive approximately 8lbs of fresh Oregon caught species including: Rockfish, Cabezon, Black Cod, Pacific Halibut, Chinook Salmon, Albacore Tuna, Lingcod, and Dungeness Crab. Half shares are \$50 a month and yield approximately 4lbs of fish. The species are seasonal and availability is limited based on quotas and other external factors but we will do our best to provide an assortment of superior seafood.

We will be expanding to Portland in April 2013 and the Rouge Valley in 2014. Please follow us on Facebook for the latest updates on our progress. Look for our updated website at [www.posustainableseafood.com](http://www.posustainableseafood.com) for information on how you can join our CSF and help support sustainable fishing for Oregon.

We currently have space to add 100 new members. Space is limited and based on first-come first-serve basis.
